

PRE-DEVELOPMENT QUESTIONNAIRE

2-2-01 SAB

JAN 29 2001

The following information request will be needed for the creation of all of the written materials for your project. Please return this information to us as soon as possible. Consult your Inventors Manual for more information and direction. **PLEASE COMPLETE ALL QUESTIONS.**

Be careful to write names, etc. exactly as you want them to appear on all official documents.

(PLEASE PRINT CLEARLY)

NAME C Glen Berry
(FIRST) (MIDDLE) (LAST)

CO-INVENTOR†
(FIRST) (MIDDLE) (LAST)

❖ Only fill in if this is a true co-inventor, who had a hand in inventing the product and whose name should appear on the patent application.

ADDRESS P.O. Box 1936
(APT. OR HOUSE #) (STREET)
Bentonville Ar. 72712
(CITY) (STATE) (ZIP CODE)

Home Phone: (501) 273-7908 Work Phone: () -
Cell 501-366-8268

PRODUCT NAME Emergency Mobile Sleeping Units

❖❖❖ All items marked with an asterisk (*) ARE OPTIONAL. This information is needed if you choose to participate in the Press Release part of the program. If you wish to decline the Press Release program at this time, please initial here: 

MARITAL STATUS* Divorced

SPOUSE'S NAME* ^{Ex-Wife} Jacquie S. Berry
(FIRST) (MIDDLE) (LAST)

CHILDREN* C. Glen Fewkes Jr. - Damon W. Berry

GRANDCHILDREN* Nicholas Glen Fewkes - Brittany Berry - Kayla Berry

EMPLOYER'S NAME* Noel Transportation Services POSITION* Truck Driver

YOUR HOBBIES AND INTERESTS:* motorcycle Riding - Quarter Horses -

Elk - Deer - Bear Hunting - Camping

THE STORY BEHIND YOUR INVENTION/ OTHER PERTINENT INFORMATION THAT MAY BE HELPFUL IN PROMOTING YOUR IDEA (Attach additional sheets if necessary).

See below

The following information is VITAL to the preparation of most of the items associated with your project, including your *Patent Application*. Please provide as much detail as possible. Refer to the Inventors Manual section entitled, "PRE-DEVELOPMENT QUESTIONNAIRE." ATTACH EXTRA SHEETS IF NECESSARY.

1. Sketch how your invention looks in detail. If you have a drawing or photograph, please attach it and label and name each part. State the function of each part and how it works.

Note: If an illustration was done for you by us, please check which of the following apply:

- ☐ Illustration is fine as-is. I have attached a copy of it.
- ☒ I have attached a copy of it and indicated all necessary changes.
- ☐ Refer to my sketch (below, or attached) and provide completely new drawings.

UPS Truck with a set of 28 ft pups stopped in a rest area that I was following & we started measuring to see how many I could get into each trailer with the table & counter plus frig. & microwave & lighting.

had been keeping track, as I do every year, of forest fires in the U.S. & seen with all the fires & Earth Quakes - Hurricanes - that everyone is still sleeping on the ground, as they did in the 60's as I had to do when I was on the fire crew & rescue team for US Forest Service. There is no need for these hard working men & women to sleep & try to rest like this - this is the new millennium -

You can't get the rest your body needs by sleeping on cold - damp ground or in a pile of rocks. So this idea was born.

They can be used for evic. or clean up crews a Hurricane - Earthquake sites - floods. Easily moved from one local to anywhere. Can be anywhere in the lower 48 & setup sleeping people in 70 hrs or less.

Trks. are short enough as to be able to negotiate any obstacles that they might can across -

2. From start to finish, state exactly how your invention is used (as if you are writing an instruction booklet to accompany the product.)

See last page

3. In comparison to products that are currently patented or used to perform this task or fill this need that you know of, how is your invention different, better and unique? Make direct comparisons of the advantages your invention has over the others.

See last page

4. Name any other use(s) for or benefit(s) of your invention:

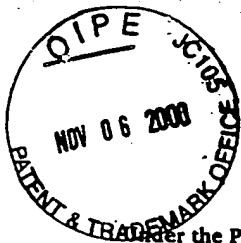

See previous 2 pages

5. What else can you disclose about your invention?

This information was written on the 26th day in the month of Jan in the year 2001 by :

INVENTOR'S QUESTIONNAIRE

Please fill out this questionnaire to your best ability. Some of the information requested may appear to be redundant, but it does allow our Staff to provide you with clear, concise information. Consult your representative for any assistance or guidance.

1. How would you like your name to appear on all written materials?

C. Glen Berry

2. If you have a co-inventor or co-inventors, do you want their name to appear on all materials? Yes ☒ No. If so how do you want their name to appear?

3. How would you like the Invention Name to appear on all written materials?

Emergency Mobile Sleeping Units

4. Describe your Invention/Idea in as much detail as possible:

(Please attach additional paper to this form if necessary)

SEE Attached Sheet!

5. Provide instructions as to how someone would use your Invention/Idea:

Take INTO Forest Fire Base Camps - Hurricanes - Tornadoes - Earthquake Areas
For Quality Sleep For Fire Fighter - Cleanup crews in Hurricanes - Tornadoes - Quakes

6. List all of the benefits and/or advantages that your Invention/Idea has:

To Give Quality Sleep + rest so Above (5) will be more alert as to what's
go on around them + others

(Over)

7. Does your Invention/Idea solve a particular problem? If so, how does it solve this problem?

See Questions 6-5

8. Do you have any suggestions as to the materials necessary to manufacture your Invention/Idea? If so, what would you recommend?

Aluminum Channel - 250" to 300" ratings nylon web Straps or rubber coated chains
For hanging bundles so to fold up against walls.

9. What do you think the retail price of your Invention/Idea would be?

No Price - Can't put one on Human life!

10. What stores, outlets or distributors would carry your Invention/Idea?

None

11. What products, if any, would compete with your Invention/Idea? What are their retail prices?

None

12. Who do you feel would buy your Invention/Idea? (Use)

US Forest Service - F.E.M.A.

13. Add any additional comments here:

***If the drawing that you provided us with on the Official Record of Invention is not a detailed drawing, please attach a detailed drawing to this form. Please, if appropriate, label each part.

OCT 19 2000

To Whom It May Concern,

I've been a truck driver for 32 years, no accidents, a clean MVR. I have worked for the US Forest Service in the 60's, a Fire Fighter, and on the Rescue Team at the Valley Yermo District, stationed at Big Pines, California.

I have come up with an idea that should be brought to the Governments attention. Should it be approved by you and others, I would run it myself, as I know what needs to be done and how to make it work. It would benefit our Forest Fire Fighters and could be used for National and State Emergencies, be it earthquakes, Hurricanes, Tornadoes, or Floods.

I have talked to USFS Fire Monitoring Station Washington DC, Valley Yermo District, SmokeJumpers Center Missoula Montana, and the Governors Office in Helena, Montana. They all think it's a great idea and would support and use it.

I call my idea Emergency Mobile Sleeping Units. It's hard to explain, but I will try. It's better to talk about it instead of trying to put it into writing. The idea is to take a class 7 tractor (truck) and two 28 foot insulated trailers, mount 12 navy style bunks down each wall, sleeping 24 total per trailer, or 48 per set. Mount small refrigerator units on the nose for air conditioning and overhead lights, water coolers and an apartment size refrigerator for bottled water and food.

When you get to the bottom of the Mountain to go into Fire Base Camp, drop one trailer, take the other in and come back after the other. They will work as they are short enough to negotiate corners on fire roads, and they can be used also for evacuation, should a camp be threatened by being overrun with fire. From where I live we can be anywhere in the lower 48 states and setup within 70 hours or less.

These units would or can saves lives as the fire fighter has a way for his body and mind to rest. I know that after a certain amount of time sleeping on the ground or in a pile of rocks your mind sleeps but your body does not. So with these units the ladies and gentlemen will be more alert as to what is going on around them.

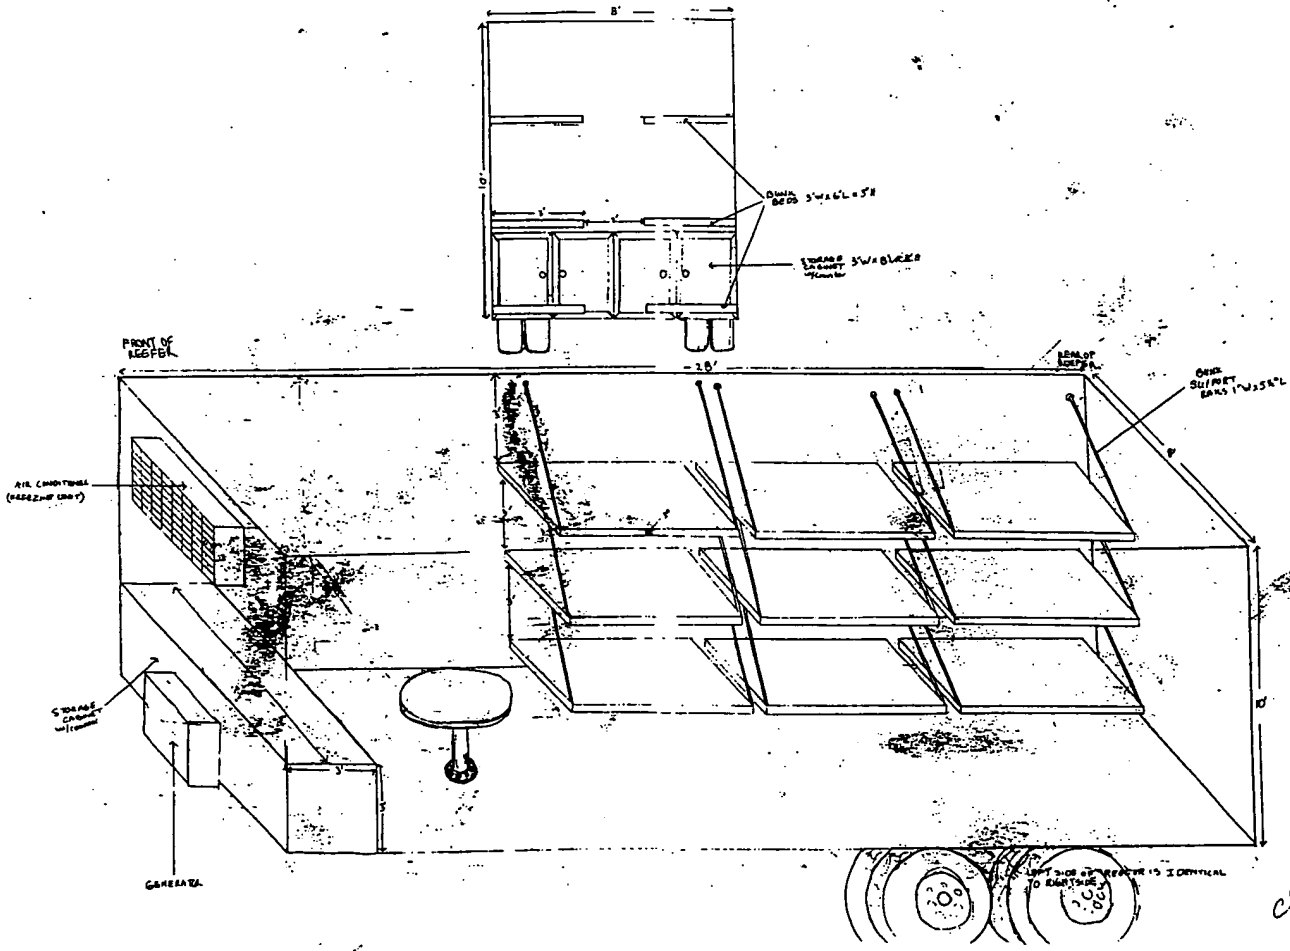

Would you be interested in contracting such units if made available to you? I would greatly like to know so I can order said trailers, as they have to be specially ordered from factory.

Thank you for your time and patience on this matter. Your response is greatly appreciated.

Yours Truly,

C. Glen Berry

Notice: PROHIBITED INVENTIONS:

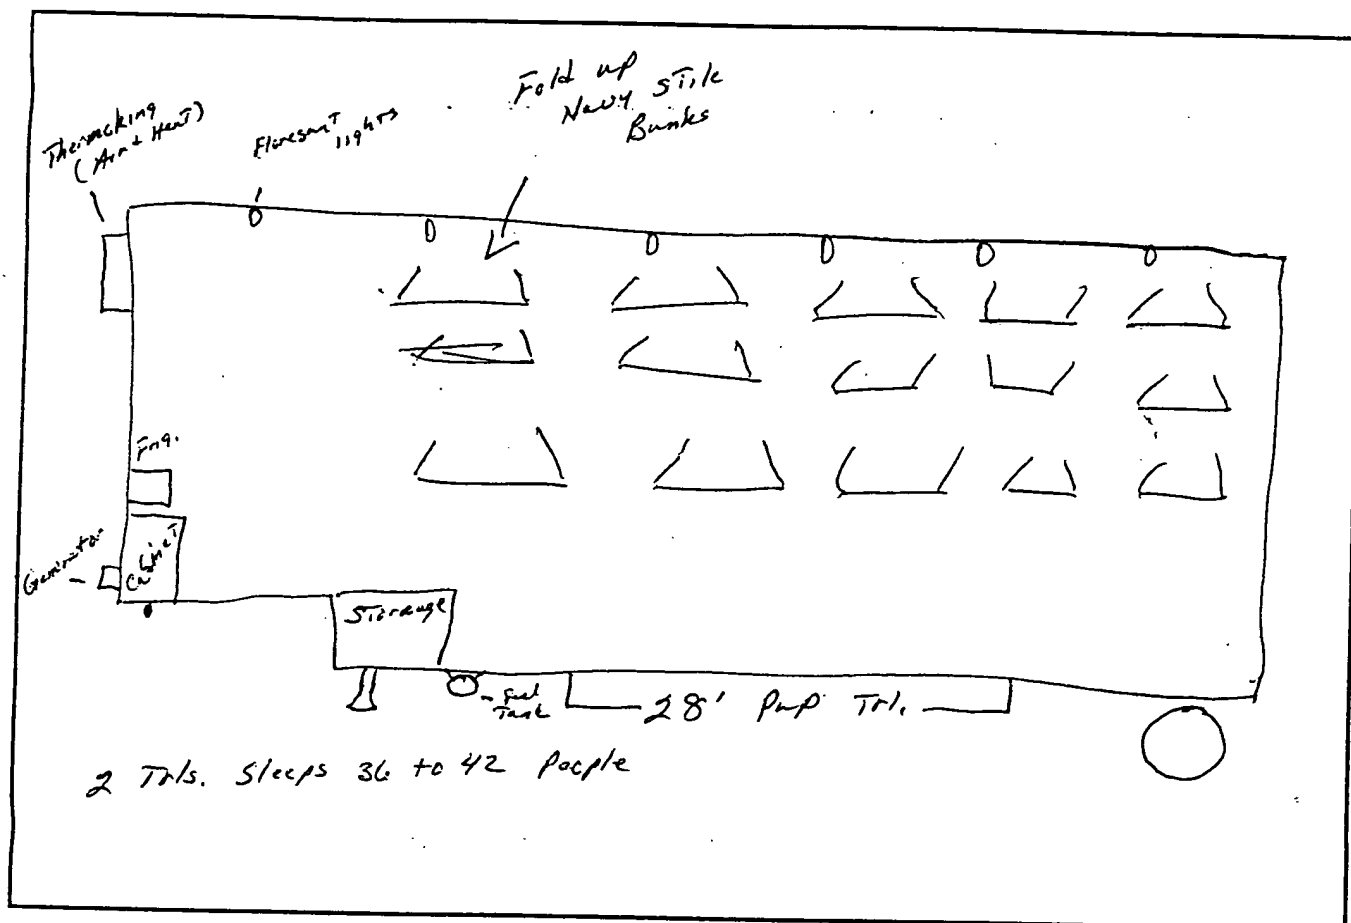

The following are categories of ideas or inventions that are not acceptable for research and development by The Inventors Network:

1. Perpetual motion device or machine (any invention that can run indefinitely without re-generating the energy source.)
2. Products or ideas using the name, likeness, or logo of an individual group or corporation (i.e. a "Batman" doll).
3. Chemical formulas or medications
4. Product ideas without component design, or based on an unrealistic level of technology (i.e. ideas that have no plans as to how it should actually work).
5. Pornographic devices or products, or those considered harmful or in poor taste.
6. Military weapons.
7. Ideas not related to products such as: *a. Business franchises. *b. Services to consumers, business, or government. *c. Advertising slogans or campaigns. *d. Literary or musical works. *e. Suggested public policies.

For all items marked with an asterisk(*), we can help you with trademark or copyright protection for these types of ideas, but cannot assist in the marketing of them.

ILLUSTRATION

Please furnish a drawing of your product idea in the space provided. A professional illustration is not necessary nor expected. If photographs are available, please attach.

Please list suggested components and materials, etc.:

DO NOT SUBMIT PROTOTYPES OR WORKING MODELS UNLESS REQUESTED. THE INVENTORS NETWORK IS NOT RESPONSIBLE FOR THE SAFE ARRIVAL, HANDLING, MANAGING OR RETURN OF ANY PROTOTYPES MAILED TO OUR ATTENTION UNLESS REQUESTED BY THE INVENTORS NETWORK.

PRODUCT/IDEA DESCRIPTION

Describe your product/idea.

Emergency Mobile Sleeping Units

Explain the product/idea's function(s).

Sleeping men + women at Forest Fire Base Camps - Natural Disasters
Such as Earth Quakes - Hurricanes - Tornadoes

List the product/idea's benefits and unique qualities.

Quality sleeping + Rest for Fire Fighter (Forest) They can't get Quality
rest sleeping on ground - I know used to be a Forest Fire Fighter
+ one Rescue Team USFS Valleyermo Ranger Dist. Angeles National Forest - Calif.

If this is an improvement on an existing product, list the new benefit(s).

BACKGROUND INFORMATION

When did you conceive your product/idea? 8-1-00

Briefly state how you first conceived this idea (work, hobby, etc.). Driving down Highway

List those individuals to whom you have revealed your product/idea.

C.F. Fewkes - C Glen Fewkes Jr. - US Forest Service - GSA Office, Ft. Worth, TX - President of USA.

Have you constructed a prototype? No Has it been tested/used? No - Yet

PATENT STATUS

	YES	NO
Has a patent search been conducted? If yes, please attach.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you filed a patent application on your product/idea?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Do you have an issued Patent on your product/idea? If yes, please indicate date of issue or attach a copy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Have you made a public disclosure of your invention or offered it for sale?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

If yes, please explain: Not for Sale - Contract for US Forest Service for use + US Government
For Natural Disasters Disasters (Earthquake - Hurricanes - Floods)

ADDITIONAL INFORMATION

Please include any additional information you feel may help us in understanding your product/idea.

FROM: Richard J. Spinola, PE
RE: EMERGENCY MOBILE SLEEPING UNITS / C. GLEN BERRY
DATE: December 12, 2000

Upon evaluation of EMERGENCY MOBILE SLEEPING UNITS, it is my professional opinion that the new product idea is technically feasible. EMERGENCY MOBILE SLEEPING UNITS is a device, which allows emergency or rescue personnel to sleep comfortably at the disaster site. The invention is designed to provide a convenient mobile sleeping shelter for 18 rescue personnel per unit. The invention provides the advantage of a mobile air-conditioned sleeping unit, which contains a refrigerator, light fixtures, storage cabinets, water cooler, and a dining table in a 28-foot trailer. EMERGENCY MOBILE SLEEPING UNITS is particularly useful for such applications as forest fires, hurricanes, tornadoes, earthquakes, floods, and other natural disasters where emergency or rescue personnel are utilized for several days. EMERGENCY MOBILE SLEEPING UNITS with their small size can negotiate the fire roads in most forests. The invention can be moved quickly to a disaster site when needed by a Class 7 tractor. The invention provides an on board electric generator which powers the air conditioning unit, the lighting fixtures, and the refrigerator along with other electrical appliances. EMERGENCY MOBILE SLEEPING UNITS features convenient sleeping bunks and food storage during a disaster. The invention eliminates the need for a forest fire fighter or a rescue worker to sleep on the ground as is presently done when fighting major fires. The invention, which is designed to provide comfortable sleeping quarters for the crew enables the fire fighters to remain alert while working, resulting in a reduction of the number of physical injuries or deaths to the rescue personnel.

EMERGENCY MOBILE SLEEPING UNITS consists of:

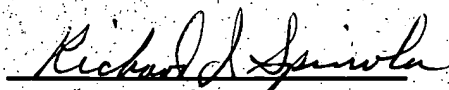

- | | | | |
|------|-----------------------|-------|--------------------------------------------------------------|
| i) | Electric generator | vii) | Storage cabinets |
| ii) | Air-conditioning unit | viii) | Twenty to twenty-four Navy style wall hung bunks per trailer |
| iii) | Refrigerator | ix) | Fluorescent lighting fixtures |
| iv) | Table | x) | Water cooler |
| v) | Class 7 tractor | | |
| vi) | Two 28-foot trailers | | |

EMERGENCY MOBILE SLEEPING UNITS would be utilized by placing the required number of units at the disaster site. Next, the emergency personnel are bunked and fed in the trailers during rest periods.

As I understand, the inventor's intentions, EMERGENCY MOBILE SLEEPING UNITS would be constructed of various equipment such as air-conditioning, refrigerators, lighting fixtures, bunks, and a tractor-trailer rig. These components are known to the industrial community, readily available, and at a reasonable cost.

EMERGENCY MOBILE SLEEPING UNITS can be produced by conventional automobile conversion techniques. There are many companies throughout the industrialized nations capable of performing the manufacturing process.

Although development still remains which could alter production design, the above is my considered opinion at present.

Richard J. Spinola, P.E.
